DETAILED ACTION

1. Claims 8,23,28 and 31 have been cancelled.
2. Claims 33-35 have been added.
3. Claims 1,11,13,21,24-25, and 29 have been amended.
4. Claims 1-7,9-22,24-27, 29-30 and 32-35 are pending.

Response to Arguments

5. Applicant's arguments filed 18 January 2005 have been fully considered and they are persuasive.

Allowable Subject Matter

6. **Claims 1-7, 9-22, 24-27, 29-30 and 32-35** are allowed.
7. The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method and system for providing distributed web server authentication. Each independent claim identifies the uniquely distinct features **"creating a user password cookie using a shared secret key, wherein the web server is part of a common authentication ring having a plurality of web servers, each of the plurality of web servers having the shared secret key"**. The closest prior art Howard et al. (US Patent No. 6,678,731) discloses an authentication system generating encrypted cookies using a key to a web server, preventing other web servers from protected information stored within the cookies, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.
8. Therefore, **claims 1,13, and 24-25** and the respective **dependent claims 2-7,9-12,14-22,26-27, and 29-30, and 32-35** are in condition for allowance.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
